DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4,9 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 7-53865.

3. JP 7-53865 discloses the lighting equipment with the chemical structure as recited in claims 1 and 9 including the material with the chemical structure being used for a reflector. JP 7-53865 does not disclose specifically a metal film provided on the substrate, a lens on the light source and a lamp cover. It would have been obvious to one of ordinary skill in the art at the time the invention was made for a reflector to have a metal film provided on the reflector housing inner surface, since this type of assembly is old and well known in the art for providing a reflective surface to a reflector since metallic film applied by spraying, sputtering or other well known methods is commonly practiced. With regards to a lighting equipment comprising a lens in addition to a reflector, it would have been obvious to one of ordinary skill in the art at the time the invention was made to implement a lens to a lighting equipment since lenses are old and well known in the art for use in a reflective lighting device for the purpose of further modifying the emitted light to a desired criteria. With regards to the lamp cap, it would have been obvious to one of ordinary skill in the art at the time the invention was made

to implement a lamp cap in a lighting device with a reflector since lamp caps are well known in the art to protect the inner components of a lighting device.

Allowable Subject Matter

4. Claims 6,19-32 are allowed.
5. Claims 5,10-14,16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not recite the chemical structure of claims 6,19-32 for the manufacturing of a lens and lamp cover.
